

Network Performance Analysis Report

Executive Summary

This report analyzes network performance data collected from 2 monitoring locations testing connectivity to vimeo.com/226053498?autoplay=1&loop=1 over 4.1 hours. A total of 46 measurements were collected during the test period. **Key Findings:**

- Average network latency: 30.0 ms
- Average packet loss: 0.00%
- Test completed: completed
- Monitoring clients: 2 locations

Test Configuration

| Test Name | Stream Test |
|-----------------------|---|
| Destination | vimeo.com/226053498?autoplay=1&loop=1 |
| Start Time | 2025-06-24 06:23:46 |
| End Time | 2025-06-24 10:28:47 |
| Duration | 300 seconds |
| Measurement Interval | 5 seconds |
| Status | COMPLETED |
| Participating Clients | 2 |

Key Performance Indicators

| Network Performance Metrics | Average | Min | Max | Status |
|-----------------------------|---------|------|-------|-----------|
| Ping Latency (ms) | 30.0 | 26.7 | 38.7 | Excellent |
| Network Jitter (ms) | 4.21 | 0.35 | 21.33 | Excellent |
| DNS Resolution (ms) | 0.4 | 0.4 | 0.4 | Excellent |
| Download Speed (Mbps) | 0.7 | 0.4 | 0.8 | Poor |

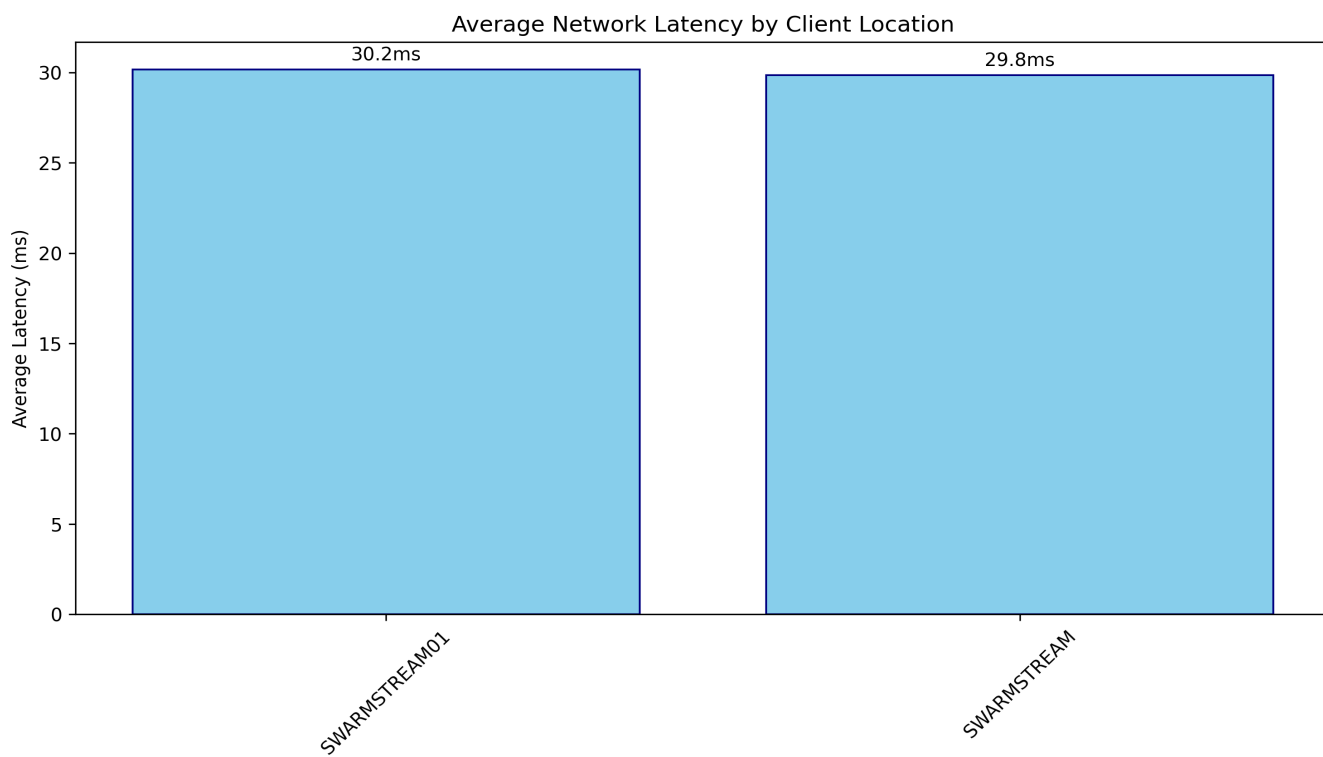

| System Resource Metrics | Average | Min | Max | Status |
|-------------------------|---------|------|------|-----------|
| CPU Usage (%) | 0.8 | 0.0 | 1.5 | Excellent |
| Memory Usage (%) | 5.9 | 5.4 | 6.4 | Excellent |
| Disk Usage (%) | 3.4 | 3.4 | 3.4 | Excellent |
| CPU Load (1min) | 0.07 | 0.00 | 0.22 | Excellent |

| Advanced Network & QoS | Value | Analysis | | |
|------------------------|-------|----------|--|--|
| ECN Support | No | Info | | |
| Traffic Policing | None | Info | | |

Network Latency Over Time

Client Performance Comparison

Client Performance Analysis

| Client Location | Avg Latency (ms) | Avg Packet Loss (%) | Measurements | Status |
|-----------------|------------------|---------------------|--------------|-----------|
| SWARMSTREAM01 | 30.2 | 0.00 | 23 | Excellent |
| SWARMSTREAM | 29.8 | 0.00 | 23 | Excellent |

Quality of Service Analysis

Quality of Service Analysis:

QoS data collected from 46 measurements.

DSCP Value Distribution:

- DSCP 26 (AF31): 46 measurements (100.0%)

Recommendations

- INFO: ECN not detected. Consider enabling ECN for improved congestion handling.
- MEDIUM: Low download bandwidth <10 Mbps. Consider bandwidth upgrade for improved user experience.
- Implement continuous monitoring for early issue detection.
- Schedule regular performance reviews to track improvements.
- Consider capacity planning based on growth projections.
